DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a user interface for controlling networked devices, classified in class 725, subclass 80.
 - II. Claims 20-29, drawn to access control to networked devices, classified in class 725, subclass 78.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as regulating controller access to a device to avoid conflicts between multiple controllers attempting to control a given device concurrently. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Furthermore, because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Telephone calls were made to Mr. Michael E. Forgarty on several occasions, however the attorney could not be reached for comment. Therefore, an election has not been made.

Art Unit: 2614

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
